Professor is super nice and truly wants students to learn. Since I took AP Micro, I found a decent amount of overlap with the content. The only stuff that was more tricky was

toward the end but I went to office hours and she helped so much.

This course was very difficult but the professor was good. She taught the content well and the lectures were useful. That being said this was by far one of the most competitive cut-throat classes I took at Stern. The final curve ended up being incredibly tight

If you're NYU, don't listen to these Cornell reviews. Micro w/ Calc is tough in general, but she is the nicest and smartest professor I've had. Even when she had personal things going on and had to travel during the Sem, she would still hold class. Truly cares about her students. Definitely be prepared to put the time and effort in though!

Professor Brancaccio is amazing! She explains the concepts very well and uses many examples and practice to make sure you understand! Her class is pretty straightforward, and she creates a welcoming environment. The
